ROAD CLOSURE

Kenwood Road, Whetsel Avenue

Several projects are underway in the Cincinnati neighborhood of Madisonville and the City of Maderia which will impact traffic for several months. The Metropolitan Sewer District is constructing a new sewer line on Whetsel Avenue as part of a major sewer improvement for the area. This work requires the closure of a portion of Whetsel Avenue to through traffic for approximately four months.

The construction of a new water main has also begun on Kenwood Road as part of the development of the Stratford retirement community and Kenwood Pointe condominiums. This work requires the closure of a portion of Kenwood Road from Kenwood Hills Drive to Madison Road for approximately six months.

The City of Cincinnati, Hamilton County and the City of Maderia have coordinated an appropriate detour for these projects to reconnect Kenwood Road to Madison Road via Euclid Avenue and Stewart Road. Detour signs are in place. The closures are in place for through traffic, but local and emergency access will be maintained.

Specific traffic restrictions are:

Kenwood Road- Local access will be maintained from Madison Road north to Chandler Street. Local access will be maintained from Euclid Avenue south to Kenwood Hills Drive and the Stratford sales offices. No through traffic will be allowed.

Whetsel Avenue- Local access will be maintained from Madison Road north to Monning Avenue and from Kenwood Road west to Wind Street. No through traffic will be allowed.

We appreciate everyone's patience during the installation of these public utilities. For additional information you may contact the Department of Transportation and Engineering at 352-6229 or visit: www.cincinnati-oh.gov/dote

Drivers are encouraged to reduce their speed and use caution when approaching the closure area.
